

Penguin Rap (6x)

(Music and Lyrics by Mr I-Yurgen Ilaender)

Brr, I'm cold, I'm freezing
Where are we?
In Antarctica
Careful where you walk, you don't want to step into an ice crevice

Look someone's coming
It's a penguin

Yo, y'all don't make me a fuss
I'm a penguin my name's Pythagorus
I'm a bird even though I never can fly
But Yo I can sho' multiply- Let's go, Yo!

We'd love to learn a few new tricks
Could you teach us to multiply by six?

Let's go, yo!
Oooo here we go gang

6x1 is 6 (yo) (echo) 6x2 is 12 (yo) (echo) 6x3 is 18 (yo) (echo)
6x4 is 24 (yo) (echo) 6x5 is 30 (yo) (echo) and 6x6 36 (yo) (echo)

Antarctica's quite cool you know despite the wind and blowing snow
With the eco system the way it is
It's a favorite place for scientists

6 12 18 24 30 36 42 Phew! 48 54 60 66 72 78 that's great

Tell us what kind of creatures live here at the cold South Pole?
Seals, whales, penguins and flying birds too you know

Why do they come to Antarctica?
To feed upon the krill
And there's millions of moving icebergs
Oh to me they look quite still

Let's rest here by Mount Erebus
Oh look there's Pythagorus

Yo, y'all don't make me a fuss
I'm a penguin my name's Pythagorus
I'm a bird even though I never can fly
But Yo I can sho' multiply- Let's go, Yo!

Oh, here we go again, hang on

Now 6x7 is 42 (Yo) (echo) 6x8 is 48 (yo) (echo) 6x9 is 54 (yo) (echo)
6x10 is 60 (yo), (echo) (Ha) 6x11 is 66 (yo) (echo) and 6x12 is 72 (yo) (echo)
(Ha)

That Pythagorus sure is a good multiplier

Bye Bye Pythagorus

Let's go Yo Ha!
Heh!
