

Seven Natural Wonders

(Music and Lyrics by David Pavane)

The 7 natural wonders of the world,
The 7 natural wonders of the world,
The 7 natural wonders of the world
Seven times one is seven!

Mount Everest is the highest mountain on the earth
And if you fall down off the top it will really, really hurt
And if you fall right on your head, it's even, even worse
Mount Everest!

Oh, the next natural wonder is the Great Barrier Reef
Oh yeah – seven times two is always fourteen
Swimming round the reef will get you really, really clean
The Great Barrier Reef!

Seven times three is always twenty-one
Just like the Grand Canyon is very, very long
And if we don't keep counting, so will be this song
Like the Grand Canyon very very long

Seven times four is twenty-eight
Seven times five is thirty-five, you're doing really great
Seven times six is always forty-two
Don't jump off Niagara Falls if you know what's good for you...

Carlsbad Caverns are under the ground
If you don't bring a flashlight, you won't find your way around
Oh and 7×7 is always 49,
And 7×8 is 56 every single time

Australia's Uluru is a mountain and a half
It looks just like a giant worm, its bound to make you laugh
[laugh]
And seven times nine is always sixty-three
And seven times ten must be seventy

And up around the Arctic pole we have the Northern Lights
The best time to see them glow is in the dark of night
Oh seven times eleven is always seventy-seven
That's all there is, forever and ever and ever, man am I in heaven
And seven times twelve is always eight-four
That's it, we're done – Hooray! My friend – we haven't any more

The seven natural wonders of the world,
Yah, now step count with me kids

Step count 7,14,21 OOO baby we're having fun...28,35,and 42 a few more numbers
then we're really, really through....49,56,and 63 step counting sevens "aint" a mystery
70,77, and 84 we're done, that's it, finito kids, there isn't any more

The seven natural wonders of the world 3X
